Contents for Volume 136

Number 1, 9 January 1989

TAYLOR, P. D., Local Stability in a Seed Provisioning Model . . . 1

WOLF, F. A., On the Quantum Physical Theory of Subjective Antedating 13

MOTRO, U. and COHEN, D., A Note on Vigilance Behavior and Stability Against Recognizable Social Parasites 21

MILLER, A. R., The Distribution of Wearout over Evolved Reliability Structures 27

BOYD, R., Mistakes Allow Evolutionary Stability in the Repeated Prisoner's Dilemma Game 47

BRITTON, N. F., Aggregation and the Competitive Exclusion Principle . 57

KLOPMAN, G. and BENDALE, R. D., Computer Automated Structure Evaluation (CASE): A Study of Inhibitors of the Thermolysin Enzyme . . 67

TOH, H., IMAMURA, A. and KANDA, K., Whether Zn^{2+} for the Polymerase System was Selected Inevitably or by Historical Accident . . . 79

GREEN, H. S. and TRIFFET, T., A Zonal Model of Cortical Functions . 87

LETTERS TO THE EDITOR

SCOTT, S. M., Comments on a Model of Egg Development and Diapause 117

HILBERT, D. W., LOGAN, J. A. and SWIFT, D. M., Comments on a Model of Egg Development and Diapause: A Reply to Susan Scott . 121

ANNOUNCEMENTS 125

Number 2, 23 January 1989

KHANIN, M. A. and SEMENOV, V. V., A Mathematical Model of the Kinetics of Blood Coagulation 127

MCGAVIN, S., Four Strand Recombination Models 135

LUSTIG, C., PARNAS, H. and SEGEL, L. A., Neurotransmitter Release: Development of a Theory for Total Release Based on Kinetics . . . 151

MOREL, R. E. and FLECK, G., Onsager's Principle: A Unifying Bio-theme 171

JAMES, W. H., Foetal Testosterone Levels, Homosexuality and Handedness: A Research Proposal for Jointly Testing Geschwind's and Dörner's Hypotheses 177

SMALL, J. R. and FELL, D. A., The Matrix Method of Metabolic Control Analysis: Its Validity for Complex Pathway Structures . . . 181

KNOLLE, H., Host Density and the Evolution of Parasite Virulence . . 199

KLISS, M., SOMPS, C. and LUTTGES, M. W., Stable Vortex Structures: A Flat Plate Model of Dragonfly Hovering 209

MATSUDA, H. and NAMBA, T., Co-evolutionarily Stable Community Structure in a Patchy Environment 229

Number 3, 8 February 1989

SHERMAN, T. F., POPEL, A. S., KOLLER, A. and JOHNSON, P. C., The Cost of Departure from Optimal Radii in Microvascular Neworks . . . 245

HASSARD, B. D. and SHIAU, L. J., Isolated Periodic Solutions of the Hodgkin-Huxley Equations 267

DUSENBERY, D. B., Efficiency and the Role of Adaptation in Klinokinesis 281

MALEV, V. V. and RUSANOV, A. I., Thermodynamics, Mechanical and Electrical Properties of Biomembranes 295

DUSENBERY, D. B., Ranging Strategies 309

ŁOMNICKI, A. and SĘDZIWY, S., Do Individual Differences in Resource Intakes without Monopolization cause Population Stability and Persistence? 317

HART, T. N., TRAINOR, L. E. H. and GOODWIN, B. C., Diffusion Effects in Calcium-Regulated Strain Fields 327

WILSON, D. S. and SOBER, E., Reviving the Superorganism . . . 337

LETTERS TO THE EDITOR

HSU, J. P. and TSENG, S., A Simple Kinetic Model for the Repair of Radiation-Induced DNA Double-Strand Breaks 357

RIDLEY, M., Why not use Species in Comparative Tests . . . 361

Number 4, 22 February 1989

CORNISH-BOWDEN, A., Metabolic Control Theory and Biochemical Systems Theory: Different Objectives, Different Assumptions, Different Results 365

WADEPUHL, M. and BEYN, W.-J., Computer Simulation of the Hydrostatic Skeleton. The Physical Equivalent, Mathematics and Application to Worm-like Forms 379

COLLADO-VIDES, J., A Transformational-Grammar Approach to the Study of the Regulation of Gene Expression 403

TAKAHASHI, M., A Model of Chromatin-dependent DNA Replication Sequences Based on the Decondensation Units Hypothesis 427

DI CERA, E., Linkage Thermodynamics of Individual Site Binding Phenomena 467

LETTERS TO THE EDITOR

SIBBALD, P. R., BANERJEE, S. and MAZE, J., Calculating Higher Order DNA Sequence Information Measures 475

FAICHNEY, G. J., Determination of Digesta Flow by Continuous Marker Infusion 485

KEASLING, J. D. and PALSSON, B. O., On the Kinetics of Plasmid Replication 487

Index to Volume 136

Adaptation: role in klinokinesis, 281
Aggregation and the competitive exclusion principle, 57
Antedating, subjective, on the quantum physical theory of, 13

BANERJEE, S. (see SIBBALD, P. R.), 475
BENDALE, R. D. (see KLOPMAN, G.), 67
BEYN, W.-J. (see WADEPUHL, M.), 379
Biochemical systems theory and metabolic control theory, 365
Biomembranes: thermodynamics, mechanical and electrical properties, 295
Blood coagulation, a mathematical model of the kinetics of, 127
BOYD, R., Mistakes allow evolutionary stability in the repeated prisoner's dilemma game, 47
BRITTON, N. F., Aggregation and the competitive exclusion principle, 57

Calcium-regulated strain fields, diffusion effects in, 327
CASE: a study of inhibitors of the thermolysin enzyme, 67
Chromatin-dependent DNA replication sequences; a model based on the decondensation units hypothesis, 427
Co-evolutionarily stable community structure in a patchy environment, 229
COHEN, D. (see MOTRO, U.), 21
COLLADO-VIDES, J., A transformational-grammar approach to the study of the regulation of gene expression, 403
Community structure, co-evolutionarily stable, in a patchy environment, 229
Comparative tests, why not use species in (letter), 361
Competitive exclusion principle, and aggregation, 57
Computer automated structure evaluation (CASE): a study of inhibitors of the thermolysin enzyme, 67
Computer simulation of the hydrostatic skeleton. The physical equivalent, mathematics and application to worm-like forms, 379
CORNISH-BOWDEN, A., Metabolic control theory and biochemical systems theory: different objectives, different assumptions, different results, 365
Cortical functions, a zonal model of, 87
Cost of departure from optimal radii in microvascular networks, 245

Decondensation units hypothesis, a model of chromatin-dependent DNA replication sequences based on, 427
DI CERA, E., Linkage thermodynamics of individual site binding phenomena, 467
Diffusion effects in calcium-regulated strain fields, 327
Digesta flow determination by continuous marker infusion (letter), 485
DNA double-strand breaks, radiation-induced, a kinetic model for the repair of (letter), 357
DNA replication sequences, chromatin-dependent; a model based on the decondensation units hypothesis, 427
DNA sequence information measures, higher order, calculation of (letter), 475
Dragonfly hovering, a flat plate model of, 209
DUSENBERY, D. B., Efficiency and the role of adaptation in klinokinesis, 281
DUSENBERY, D. B., Ranging strategies, 309

Efficiency and the role of adaptation in klinokinesis, 281
Egg development and diapause, comments on (letter), 117

Egg development and diapause, reply to comments on (letter), 121
Environment, patchy, co-evolutionarily stable community structure in, 229
Evolution of parasite virulence, and host density, 199
Evolutionary stability in the repeated prisoner's dilemma game is allowed by mistakes, 47
Evolved reliability structures, the distribution of wearout over, 27

FAICHNEY, G. J., Determination of digesta flow by continuous marker infusion (letter), 485
FELL, D. A. (see SMALL, J. R.), 181
FLECK, G. (see MOREL, R. E.), 171
Flow, digesta, determination by continuous marker infusion (letter), 485
Foetal testosterone levels, homosexuality and handedness: a research proposal for jointly testing Geschwind's and Dörner's hypotheses, 177
Four strand recombination models, 135

Gene expression regulation, a transformational-grammar approach to the study of, 403
GOODWIN, B. C. (see HART, T. N.), 327
GREEN, H. S. and TRIFFET, T., A zonal model of cortical functions, 87

Handedness, homosexuality and foetal testosterone levels: a research proposal for jointly testing Geschwind's and Dörner's hypotheses, 177
HART, T. N., TRAINOR, L. E. H. and GOODWIN, B. C., Diffusion effects in calcium-regulated strain fields, 327
HASSARD, B. D. and SHIAU, L. J., Isolated periodic solutions of the Hodgkin-Huxley equations, 267
HILBERT, D. W., LOGAN, J. A. and SWIFT, D. M., Comments on a model of egg development and diapause: a reply to Susan Scott (letter), 121
Hodgkin-Huxley equations, isolated periodic solutions of, 267
Homosexuality, handedness and foetal testosterone levels: a research proposal for jointly testing Geschwind's and Dörner's hypotheses, 177
Host density and the evolution of parasite virulence, 199
Hovering, dragonfly, a flat plate model of, 209
HSU, J. P. and TSENG, S., A simple kinetic model for the repair of radiation-induced DNA double-strand breaks (letter), 357
Hydrostatic skeleton, computer simulation of, 379

IMAMURA, A. (see TOH, H.), 79
Inhibitors of the thermolysin enzyme; a CASE study, 67

JAMES, W. H., Foetal testosterone levels, homosexuality and handedness: a research proposal for jointly testing Geschwind's and Dörner's hypotheses, 177
JOHNSON, P. C. (see SHERMAN, T. F.), 245

KANDA, K. (see TOH, H.), 79
KEASLING, J. D. and PALSSON, B. O., On the kinetics of plasmid replication (letter), 487
KHANIN, M. A. and SEMENOV, V. V., A mathematical model of the kinetics of blood coagulation, 127
Kinetic model for the repair of radiation-induced DNA double-strand breaks (letter), 357
Kinetics of blood coagulation, a mathematical model of, 127
Kinetics of neurotransmitter release, theory of, 151
Kinetics of plasmid replication (letter), 487
KLISS, M., SOMPS, C. and LUTTGES, M. W., Stable vortex structures: a flat plate model of dragonfly hovering, 209
KLOPMAN, G. and BENDALE, R. D., Computer automated structure elevation (CASE): a study of inhibitors of the thermolysin enzyme, 67

KNOLLE, H., Host density and the evolution of parasite virulence, 199
KOLLER, A. (see SHERMAN, T. F., 245

Linkage thermodynamics of individual site binding phenomena, 457
LOGAN, J. A. (see HILBERT, D. W.), 121
ŁOMNICKI, A. and SĘDZIWY, S., Do individual differences in resource intakes without monopolization cause population stability and persistence?, 317
LUSTIG, C., PARNAS, H. and SEGEL, L. A., Neurotransmitter release: development of a theory for total release based on kinetics, 151
LUTTGES, M. W. (see KLISS, M.), 209

MCGAVIN, S., Four strand recombination models, 135
MALEV, V. V. and RUSANOV, A. I., Thermodynamics, mechanical and electrical properties of biomembranes, 295
Matrix of metabolic control analysis: its validity for complex pathway structures, 181
MATSUDA, H. and NAMBA, T., Co-evolutionarily stable community structure in a patchy environment, 229
MAZE, J. (see SIBBALD, P. R.), 475
Metabolic control analysis, the matrix method; validity for complex pathway structures, 181
Metabolic control theory and biochemical systems theory, 365
Microvascular networks, the cost of departure from optimal radii in, 245
MILLER, A. R., The distribution of wearout over evolved reliability structures, 27
Mistakes allow evolutionary stability in the repeated prisoner's dilemma game, 47
MOREL, R. E. and FLECK, G., Onsager's principle: a unifying bio-theme, 171
MOTRO, U. and COHEN, D., A note on vigilance behavior and stability against recognizable social parasites, 21

NAMBA, T. (see MATSUDA, H.), 229
Networks, microvascular, the cost of departure from optimal radii in, 245
Neurotransmitter release: development of a theory for total release based on kinetics, 151

Onsager's principle: a unifying bio-theme, 171

PALSSON, B. O. (see KEASLING, J. D.), 487
Parasite virulence, evolution of, and host density, 199
Parasites, social, recognizable, a note on vigilance behavior and stability against, 21
PARNAS, H. (see LUSTIG, C.), 151
Pathway structures, complex; validity of the matrix method of metabolic analysis, 181
Plasmid replication kinetics (letter), 487
Polymerase system: was Zn^{2+} selected inevitably or by historical accident?, 79
POPEL, A. S. (see SHERMAN, T. F.), 245
Population stability and persistence, and individual differences in resource intakes without monopolization, 317
Prisoner's dilemma game: mistakes allow evolutionary stability, 47

Quantum physical theory of subjective antedating, 13

Radiation-induced DNA double-strand breaks, a kinetic model for repair of (letter), 357
Radii, optimal, in microvascular networks, the cost of departure from, 245
Ranging strategies, 309
Regulation of gene expression, a transformational-grammar approach to the study of, 403
Reliability structures, evolved, the distribution of wearout over, 27

Repair of radiation-induced DNA double-strand breaks, a simple kinetic model for (letter), 357
Replication, plasmid, the kinetics of (letter), 487
Replication sequences, DNA, chromatin-dependent; a model based on the decondensation units hypothesis, 427
Resource intakes without monopolization, do individual differences cause population stability and persistence?, 317
RIDLEY, M., Why not use species in comparative tests (letter), 361
RUSANOV, A. I. (see MALEV, V. V.), 295

SCOTT, S. M., Comments on a model of egg development and diapause (letter), 117
SĘDZIWY, S. (see ŁOMNICKI, A.), 317
Seed provisioning model, local stability in, 1
SEGEL, L. A. (see LUSTIG, C.), 151
Selection of Zn^{2+} for the polymerase system, was it inevitable or an historical accident?, 79
SEMENOV, V. V. (see KHANIN, M. A.), 127
SHERMAN, T. F., POPEL, A. S., KOLLER, A. and JOHNSON, P. C., The cost of departure from optimal radii in microvascular networks, 245
SHIAU, L. J. (see HASSARD, B. D.), 267
SIBBALD, P. R., BANERJEE, S. and MAZE, J., Calculating higher order DNA sequence information measures (letter), 475
Site binding phenomena, linkage thermodynamics of, 467
SMALL, J. R. and FELL, D. A., The matrix method of metabolic control analysis: its validity for complex pathway structures, 181
SOBER, E. (see WILSON, D. S.), 337
Social parasites, recognizable, a note on vigilance behavior and stability against, 21
SOMPS, C. (see KLISS, M.), 209
Species: why not use them in comparative tests? (letter), 361
Stability, evolutionary, in the repeated prisoner's dilemma game, is allowed by mistakes, 47
Stability, local, in a seed provisioning model, 1
Stability of populations, and individual differences in resource intakes without monopolization, 317
Stability against recognizable social parasites, a note on vigilance behavior and, 21
Stable community structure in a patchy environment, 229
Stable vortex structures: a flat plate model of dragonfly hovering, 209
Strain fields, calcium-regulated, diffusion effects in, 327
Structures, reliability, evolved, the distribution of wearout over, 27
Superorganism, reviving the, 337
SWIFT, D. M. (see HILBERT, D. W.), 121

TAKAHASHI, M., A model of chromatin-dependent DNA replication sequence based on the decondensation units hypothesis, 427
TAYLOR, P. D., Local stability in a seed provisioning model, 1
Testosterone levels in the foetus, homosexuality and handedness: a research proposal for jointly testing Geschwind's and Dörner's hypotheses, 177
Thermodynamics, linkage, of individual site binding phenomena, 467
Thermodynamics, mechanical and electrical properties of biomembranes, 295
Thermolysin enzyme inhibitors, a CASE study of, 67
TOH, H., IMAMURA, A. and KANDA, K., Whether Zn^{2+} for the polymerase system was selected inevitably or by historical accident, 79
TRAINOR, L. E. H. (see HART, T. N.), 327
Transformational-grammar approach to the study of the regulation of gene expression, 403
TRIFFET, T. (see GREEN, H. S.), 87
TSENG, S. (see HSU, J. P.), 357

Vigilance behavior and stability against recognizable social parasites, 21
Vortex structures, stable; a flat plate model of dragonfly hovering, 209

WADEPUHL, M. and BEYN, W.-J., Computer simulation of the hydrostatic skeleton. The physical equivalent, mathematics and application to worm-like forms, 379
Wearout distribution over evolved reliability structures, 27
WILSON, D. S. and SOBER, E., Reviving the superorganism, 337
WOLF, F. A., On the quantum physical theory of subjective antedating, 13
Worm-like forms: application of computer simulation of the hydrostatic skeleton, 379

Zn^{2+} for the polymerase system, was it selected inevitably or by historical accident?, 79
Zonal model of cortical functions, 87
